## DETAILED ACTION

### *Amendment*

1. Acknowledgement is made of Amendment filed 21 January 2004.

### *Allowable Subject Matter*

2. Claims 1-46 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The record of prior art fails to teach or fairly suggest a code reading apparatus including a reading section for optically reading an optically readable code from a recording medium on which data is recorded as the optically readable code; an output section for performing an output based on an outcome of a code reading operation of the reading section; and a randomness providing section providing the outcome of code reading operation of the reading section randomness, so that the output of the output section, which is based on the outcome of the code reading operation, is varied by the randomness provided by the randomness providing section.

Wang teaches a machine readable code in a form such as a bar code using self-addressed address/data packets which can be positioned in arbitrary orders and configurations. Packets may be randomly positioned and configured to directly communicate some desired information to human observers.

Krichever teaches a hand-held barcode reader, which is inherently held by hand while reading the barcode and moved relatively to each other.

Cymbalski et al. (US 5,324,923) teaches apparatus for producing a dynamically variable machine readable binary code and method for reading and producing thereof.

However, Wang, Krichever and Cymbalski, taken alone or in combination thereof, fails to teach a code reading apparatus having a randomness providing section providing the outcome of code reading operation of the reading section randomness, so that the output of the output section, which is based on the outcome of the code reading operation, is varied by the randomness provided by the randomness providing section.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kimberly D. Nguyen whose telephone number is 571-272-2402. The examiner can normally be reached on Monday-Friday 7:30-4:30.
